PROFESSIONAL SUMMARY

Full-Stack Engineer & AI Developer specializing in **TypeScript**, **Next.js**, and cloud-native architectures (**AWS**, **Cloudflare**). Engineered AI platforms serving **21k+ views** and automated registrar workflows, reducing turnaround from **5 days to 40 minutes**. Expert in **RAG (Gemini Pro)** and **FastAPI**, driving a **40% reduction** in operational overhead and **240% organic growth** through scalable, production-grade automation.

WORK EXPERIENCE

Full Stack Developer Intern

M.P. Pharmaceuticals Group of Co.

Aug. 2025 – Oct. 2025

Ambala, India

- Revamped the corporate platform using **Next.js 15** and implemented advanced SEO strategies, driving a **240% increase in organic traffic** to reach **10k+ monthly visits**.
- Developed a context-aware AI chatbot with session memory using **Gemini SDK**, which reduced the bounce rate by **18%** by providing instant business context to visitors.
- Configured **Cloudflare R2 + Workers CDN** to accelerate asset delivery, maintaining a consistent **~21% bounce rate** through optimized caching.

PROJECTS

Automated Result Analysis System (Singularity) | *Generative AI, FastAPI, MongoDB* Nov. 2024 – Feb. 2025

🔗 Live Link | 📄 GitHub

- Architected a **cross-cloud RAG system** using **Gemini Pro** and **FastAPI**, deployed on **Google Cloud Run** and **Cloudflare Workers** to provide the University Registrar with **100% data-grounded institutional insights**.
- Optimized administrative workflows by processing **5,000+ academic records** via **MongoDB**, reducing manual data auditing and query response times by over **90%** through automated natural language retrieval.
- Engineered a production-grade **Admin Dashboard** featuring branch-wise Pass/Fail/PCP analytics and dynamic **Excel exports**, currently adopted by the College Registrar to streamline university-wide reporting.

Anime Discovery and Streaming Platform (Anveshna) | *Next.js, HLS, Proxy Server*

May 2024 – Present

🔗 Live Link | 📄 GitHub

- Orchestrated a scalable distributed backend serving **21.6k+ views** and **8.05k+ visitors** in last 90 days by separating the Main Content API (Fastify) from a containerized streaming scraper running on **GCP Cloud Run**.
- Built a **multimodal anime recognition engine** using **Gemini Pro Vision**, achieving **92% top-3 accuracy** across **600+ daily uploads** via optimized inference pipelines.
- Implemented a **character-driven AI chat** with **session-aware memory persistence**, delivering **personalized anime recommendations** and driving **65% repeat engagement**.

Smart Healthcare platform (Karuna) | *Next.js, Node.js, MongoDB, ZegoCloud*

Feb. 2026 – Present

🔗 Live Link | 📄 GitHub

- Engineered a comprehensive ai-assisted healthcare management platform using role-based Next.js dashboards, reducing administrative overhead by **40%** across **three user roles**.
- Facilitated seamless remote healthcare access with **sub-200ms latency** by implementing secure, real-time WebRTC video consultations utilizing ZegoCloud for **500+ patients**.
- Accelerated clinical decision-making by **60%** by developing an AI-powered medical report analysis engine to automatically extract insights and flag diagnostic abnormalities.

TECHNICAL AND SOFT SKILLS

Languages: TypeScript, JavaScript, Java, SQL, HTML/CSS

Frameworks & Libraries: Next.js, React.js, Node.js, Hono, Express, Tailwind CSS, Prisma

Cloud & Databases: AWS (EC2, S3), Cloudflare (Workers, R2,KV), Docker, PostgreSQL, Redis, MongoDB, CI/CD

Core Concepts: Data Structures & Algorithms (DSA), OOP, DBMS, Operating Systems, Computer Networking, REST, Microservices, Agile/Scrum, Unit/Integration Testing

Soft Skills: Problem solving, Accountability, Communication, Adaptability, Collaboration, Organizational Skills

EDUCATION

Meerut Institute of Engineering and Technology

Bachelor of Technology in Computer Science Engineering | **9.27 SGPA**

Meerut, India

Aug. 2023 – Expected Jun. 2027
